A NATIONAL DISERACE

Mr. Matt Carpenter, of Wisconsin, President of the United States Senate, has become the subject of a most disgressional salary grabbing the become the subject of a most disgressional salary grabbing deviation. Let use the subject of a most disgressional salary grabbing deviation from the subject of a most disgressional salary grabbing deviation. He is was who much the facts viz. That he is example in that fine of a contession about the facts viz. That he is example in that fine of the was who made the facts viz. That he is the subject of the session of the largestation in growing. As the and the real truth becoming known, he and the woman were tuned out by the landlord, that they the went to Long La meli, where they tode about together in a four-horse carriage, and in other wave shannelessly exhibited them selves to the public gra.

As this model kepublic in stands in a joint on the largest was a first the facts of the four-time shall indicate the subject of the four-time shall neither be wondered at that his conduct has been soverely criticated? And it he large to the grab now be recalled in a send of the subject of the strength of the gradient for the wondered at that his conduct has been soverely criticated? And it he large to the grab now be recalled in a send of the subject of the art. The specific truth of the facts in the matter and if a first first of the provision, its sole of grateful wonds of the facts in the matter and apply affect on swells of the art. The specific truth of the facts in the matter and apply affect for a swell sole of the subject of the provision, its sole of grateful wonds of the facts and matter to to the first shall be facts in the matter and any mater the factor is well as during the factor in swell as during the factor in A NATIONAL DISGRACE

A rect of the same of the part of the same ces that Grant does not wish to be clee-

of Senators are becoming duriningly common and such examples set by men in high places are suppling the foundations of morality in this country.

In these things some of the pulpit orated to the Liesidency for a third term ors, who have heretofore moddled so Titi Chicago Tribine, an indepenofficiously in politics, might find prog- deat Regulation | iper, comments with out themes for discourse. If they are just severty upon the inconsistencies ionest in the beliefs they profess to one of the halle if plutform adopted at Harectain, if morality be the foundation of tisbing week before last. It says H good government, then there be reed! If good government, then there be reed. The platform adopted by the Republic mouse the people of this country can State Convention of Pennsylvania. In platform adopted by the Republic to mease the people of this country to mease the people of this country from the lethergy into which they have faller. This can be done without the faller of the letting a so the fall the church members in the trial was not singular in both as more states of the letting a need that duty as the trial country for it is an anticreal into the letting a need that duty as the trial meater of the letting as need that duty as the trial meater of the letting as need that duty as the trial meater of the letting as need that duty as the put forward any condition of the letting trial faller of the letting as need that duty as the put forward any condition of the letting and scribled by its put forward any condition of the lefting resolutions were that Theorems to a called the dawn with a bad meater of the letting as need that duty as the put forward any condition of the lefting resolutions with the consideration of these with the consideration of these who put forward any condition of the lefting resolutions with the condition of the lefting resolutions with the condition of the lefting resolutions with the condition of the lefting resolution with the formal condition of the lefting resolutions with the formal condition of the lefting resolution with the formal condition of the lefting resolution with the formal condition of the lefting resolution of the lefting resolutio

The enthusasm with which the Ro pathe in nominations at Harrisburg is retrived in this city says the Pats burg Leads (Richard) is so overwhelming that it has as yet faded to find utterance. It sweeps through the outer than the parameter with the parameter of principles it is found and evil toport. It has a great which being contained the parameter of principles it is founded on the parameter of principles it is founded on the problem of the contained which the facility apparent to most people is the first than the parameter of principles it is founded on the first and another inconsistency, which is moralisating the passed according as well as of the Convention.

Out this is a report the Constitution as the first and in a report the Convention of the Convention.

Parameter of principles it is founded on the first and in a report the Constitution as the first of the Convention.

Out the first of interpretation of the Convention.

Out the first of interpretation of the Convention.

THE FARMER.

EXPERIMENTAL FARM STATISTICS. From the records of the Chester county Experimental Farm we have ex- allowing as much ginger to adhers to tracted the following results of experiments on grain, grass and fertilizers : For the experiments on wheat, the plots were laid out on oats and burley stubble; the ground manured highly with an application of bone and ash compost, at the rate of 100 lbs, dissolved bone and 8 bushels of ashes per acre. The manure plowed down, and the phosphate sown on top and harrowed in. The plots contain 1 of an acre, run east and west and begin on the south side of west part of the field. They begin with one drill breadth of wheat screenings, of Laucaster early wheatto compare with plot No. 1, of the same wheat, only perfect grains. Sown Sep-

Pounds per 14 Acre

The following wheat experiment were made on ground manured in the Spring, and sown with Hungarian grass, then fertilized with 400 pounds of bone broadcast, and 100 drilled in with the wheat, Sown with Fullz wheat on September 18th, except the first plot which was sown on September 28th. Plots containing one-sixteenth of an are:

Experiments were made with differ-

ent kinds of oats and barley, sown on corn-stalk ground, in plots of one-eighth of an acre, with the following results Rinek Norway. .

Scotch Burlie. . Black Bungarian. Common " . . . Probistow " . . . Early Yellow Oats. rprise tetts, reflect in. ONE farmer sells all his corn and

grain, or should be feed some hogs they lie in the woods where the manure is lost among the trees or is washed away down a stream of water. He crops year after year, returning no equivalent for the fertility drawn from the soil on which his crops have grown, selling everything grown which it is possible to market. He saves money, is an excellent man, but from the impoverished farmer. The other buys stock in a semifat condition, and with his produce feeds the animals till they are list class meat, thus gaining an extra price for the ment he bought as well as for the sources of profit in this transaction t in the first place the weight bought is worth more by a cent or two per pound for being made fat and ripe, and then the increased weight pays for the food, while the manure made is a third return for the consumption of produce and a farmer who contrives in this way to keep up the strength of the soil is a sensible man and an excellent farmer. It it is meritorious to make two blades of grass grow where only one grew before, what is it to bring land so low as only grow one blade where two formuly TAME AND SALT,-Prof. Johnson

recommends for fertilizing purposes to mix one bushel of sult and two bushels HAND S A P O L I O of dry line under rever, and allow the mixture to decompose gradually, thus forming chemical union. For this purpose the mixture should be made six weeks before use, or still better, two or three months, the hear being turned over occasionally. This sait and lime mixture, when applied at the rate of twenty or thirty bushels per nero, forms crops. It ages powerfully on the vegetable matter of soils; lifty-six bushels applied to turnips have produced as large a crop as barnyard manure. It is destructive to grabs and baseets in the destructive to grates and insects in the soil. Like soil it attracts moisture from the air, and is useful against drouth. Its decomposing power is remarkable, and if three or four bushels of it are mixed with a lead of muck, the latter will be thus thoroughly powfrom the air and is aseful against drouth. Its decomposing power is remarkable, and if three or four bushels of it are mixed with a lead of muck, the latter will be thus thoroughly pow HOUSEKEEPER. COOKING APPLES.

The great English physician, Sydenham, allowed no other alment to his ! patients in the febrile stages of crysapelas, and small-pox, then could be loved in boiled apples. There are a great many ways of using apples for food, and doubtless some novel ways yet to be discovered. The French, who excel in cultivary matters, are said to have 365 pulled first Torin of the next Collegiate year. ways of cooking an egg. Why should not a similar enterprise be shown in regard to the apple? An estimable lady of our acquaintance makes some very plantable dishes and descrits in this way. Apples of uniform size are solectway. Apples of uniform size are selected, and simply wiped and cored. This The Preparatory Department, last operation is quickly performed by bunching them through the middle with an apple corer, thus removing the stem, seeds and tougher parts, and making an opening for the introduction of sugar in the cooking operation which follows, After dipping the apples in water, they are placed in any deep pan or baking dish, and sprinkled with sugar, about a tenspoonful to each apple, and a ten-cup full of water turned on around them. LUMBER! LUMBER! They are then baked with a slow, stend, fire till soft, when they should be removed from the baking pans for cooling and the table. When served with eream this is a dish fit for the queen. Every part of the apple can be eater the sugar baving neutralized the acidahes in the fruit and the cooking making tender the skin. It is a capital substitota for strawberries. There is another way of treating sweet apples. Slow

them in a porcelain kettle, with just enough molasses and water on to pre-

yent their burning, till cooked through,

with all the liquid residuum, to dry and brown. This gives a baked apple, buff

and then transfer them to the oven

and spices. This is easier to make than upple sauce, which must be smothered PICKLED CARBAGE, Select firm,

fresh cabbago heads and quarter thom,

then riuse in cold water, and carefully pack in a jar, sprinkling each layer of cabbage well with salt; set aside for twenty-four hours. Press out the brine that has accommisted, and roll each piece of cabbage in palverized ginger, the cabbago as possible, then place in a sprinkle heavily with mace, cingamon, turmeric, red popper, and whole grains Charteend in the year 1914; Re-or of black pepper, white mustard seed, and a little sugar. Scald with good vinegar and let it stand thirty-six hours, then pour off the vinegar, with out allowing the spices to escape; refill the jar with fresh vinegar, and add a little sugar. Keep the cabbage pressed down under the vinegar, if necessary use a weight. If your vinegur is good

the pickles will be ready in two weeks. Capital \$145,150 Creummers.--An exchange says Then a cucumber is taken from the vine let it be out with a kulfe, leaving an eighth of an inch of the encumber on the stem; then slit the stem from the end to the vine, tenving a small Total nel caraing as National Early, \$197,717 Mb. portion of the encumber to each divition, and on each separate slit will be a new encumber as large as the first.

A QUEER MISTAKE,-As a matter of ourse, when elergymen exchange, they preach old sermons. It does not follow, however, that they should not look over the MSS, and see if the local points need alteration. We read of a Somerville (Mass.) pretcher, who went over lately to Andover to preach. In his discourse was an allusion to the Insane Asylum at Somerville. For getting he was at Andover, he said: "seener than child of mine should be subjected to GICO. SWODIE uch induction I would be willing to bave him confined in yonder instituion." And the good man pointed a the Andover Theological Seminary.

A FATHER recently found his little girl's clubby little hands full of the blossoms of a beautiful rose tree, on which he had bestowed great care.
"My dear," said he "did I not tell you not to pluck one of these trees without leave !" "Yes, papa," said the child, "bu these had leaves."
